

## **Some notes on the 2015 edition of the International Statistical Yearbook (ISY)**

DSI's internet retrieval and statistics software AllThatStats has been adapted for the International Statistical Yearbook on DVD and makes both - online and archival services - available within a common application.

### **Installation: Server2Go, in the following introduced as ISY-Server**

ISY-Server starts automatically from DVD (if not, run the server program by executing ISY.exe). As soon as ISY-Server has started it activates the embedded browser software FirefoxPortable to access ISY-AllThatStats – this might take some time.

Alternatively you can copy the DVD's content incl. ISY-Server and FirefoxPortable completely to your hard drive. Here you can also change, e.g., the Server-IP or browser settings. For further details have a look at `servernotes.txt`.

For any problems during the installation procedure, please contact our support at [dsi@dsidata.com](mailto:dsi@dsidata.com) .
